

# Autograph™

## Controls and prevents:

Pythium, phytophthora, yellow tuft and anthracnose while enhancing turf quality; a fungicide program with Autograph can also control many stress-related disease complexes

## Autograph™ Gives You More Ways To Control More Problems.

Autograph™ effectively provides superior control of Pythium and other soil-borne diseases. Autograph even controls many stress-related disease complexes, such as Summer Stress and Bentgrass Deadspot, when mixed with other fungicides like Pegasus™, Raven®, T-Bird® or Kestrel®. As a truly systemic fungicide with the active ingredient aluminum-tris, Autograph

enters the plant rapidly and then translocates throughout it. That activity prevents disease development by attacking several points in the fungal reproductive cycle, which reduces the probability of disease resistance. Autograph also stimulates production of phytoalexins in treated plants, supporting their natural defense mechanism against overall stress.

## Features

Proprietary Formulation

Highly Systemic

Convenient Packaging

Compatible with other Fungicides

Contains Proprietary Pigment

## Benefits

Provides enhanced performance for disease control and turf quality as demonstrated at various universities

Delivers better control by moving downward as well as upward in plants, especially when under stress

One case treats one acre at the high rate, or two acres at the lower rate

Gives improved control of many disease complexes such as Bentgrass Deadspot and Summer Stress when combined with other labeled products

Enhances turfgrass color and quality

## Directions For Use:

For Pythium control, apply Autograph at 4.6–9.2 ounces in 1–5 gallons of water per 1,000 square feet, based on a 14–21 day schedule. Start preventative application when conditions favor disease development. For Anthracnose, Summer Stress Complex and Bentgrass Deadspot, use applications of 4.6 ounces per 1,000 square feet, beginning early in the season with the appropriate tank-mixing partners such as Pegasus™ DF, Raven®, Kestrel® or other registered fungicides listed on the Autograph label. Make applications on a 14-day spray schedule. Avoid applications with products containing copper.

## Field Support:

When you need product or technical assistance, turn to Phoenix Environmental Care's local distributor network for responsive service and support. You can also direct any questions regarding Autograph to 1-888-240-8856 for prompt attention.
