RedWing[™] Herbicide is the Latest Addition to the Phoenix Environmental Care LLC Product Line

Valdosta, GA— RedWing[™] Aquatic and Landscape Herbicide is the newest product to be added to the Phoenix Environmental Care LLC product line, giving Phoenix the broadest line of products available in the aquatic market.

“RedWing is a highly active, non-selective aquatic and landscape herbicide that comes in an emulsifiable concentrate (EC) formulation,” says Craig Smith Aquatic Business Manager for Phoenix Environmental Care LLC. “In fact, this product is the broadest-spectrum aquatic herbicide available. It has a low-use rate, is very easy on the environment and is labeled for both aquatic and landscape uses,” says Smith.

RedWing contains two-pounds of diquat per gallon and has a low-use rate. “This means RedWing is a great choice for resistance management programs,” says Smith.

RedWing is conveniently packaged in returnable 2.5 gallon, 30 gallon, and 120 gallon returnable, refillable BATPak[®] (Buy, Apply, Turn in) containers. The product will be available after July 1, 2008.

Phoenix Environmental Care LLC specializes in turf, nursery, ornamental and aquatic products. RedWing is a trademark of Phoenix Environmental Care LLC. BATPak is a registered trademark of Phoenix Environmental Care LLC. Always read and follow label directions.
