**WingMan™ Fungicide is the Latest Addition to the Phoenix
Environmental Care LLC Product Line**

Valdosta, GA— WingMan™ fungicide is the latest product to be added to the Phoenix Environmental Care LLC product line. “With the addition of WingMan, Phoenix has one of the most extensive lines of fungicides in the entire industry” says Rick Grant, Director of Business Development for Phoenix Environmental Care LLC.

WingMan is a broad-spectrum fungicide that effectively controls a wide range of diseases on turf grasses. Those include brown patch, dollar spot, melting out, leaf spot, leaf rust, stem rust, stripe rust, fusarium blight, algae, fusarium snow mold and others.

“WingMan contains mancozeb in a 75-percent DF formulation,” says Grant. “It has a preventative, non-systemic, multi-site mode of action which means there is almost no chance that resistance to this fungicide will develop. This makes WingMan a great choice for use in resistance management programs.”

WingMan will be available in returnable 25 Lb BATPak® and 50lb bags.

Phoenix Environmental Care LLC specializes in turf, nursery, ornamental and aquatic products. WingMan is a trademark of Phoenix Environmental Care LLC. Always read and follow label directions.
